

Instructions – Hanging System L Bracket

1. Hang the artwork on the wall using either the Large Ryman Hanger or the Extended Ryman Hanger and whilst supporting the weight of the picture, have someone mark the line at the base of the artwork a little way in from either end.
2. Install two or more L Brackets with the top surface of the neoprene approximately 3mm above the base line marked on the wall. This enables the Ryman's to hold the artwork tight to the wall whilst the L Brackets carry the load. For maximum strength ensure the artwork is placed as tight to the back of the L bracket as possible.
